Authorized to work in the USA | (240)886-9396 | venkat14@umd.edu | [LinkedIn](#)

EDUCATION

UNIVERSITY OF MARYLAND (UMD) – ROBERT H SMITH SCHOOL OF BUSINESS

Master of Science in Information Systems, GPA: 3.95

College Park, MD
Aug 2025 – Dec 2026

- Achievements: Terrapin Scholar
- Relevant Coursework: Data Mining & Predictive Analytics (BUDT733), Enterprise Cloud Computing & Big Data (BUDT737), Data Analysis Using Python (BUDT704), Designing AI Systems (BUDT758O), Data Models & Decisions (BUDT731), Project Management (BDBA808R)

MANIPAL INSTITUTE OF TECHNOLOGY

Bachelor of Technology in Computer Science & Engineering, GPA: 3.41

Manipal, IND
Oct 2020 – Jul 2024

- Key Project: Data Management for an Indoor Skydiving Company – ETL Processing, Visualization & Reporting

SKILLS

Languages: Python (Pandas, NumPy, Scikit-learn, LightGBM, xGBoost), SQL, R, DAX | **Data Engineering:** SSIS, Snowflake, Azure Data Factory, SSMS, Git, MongoDB, Neo4j, Kafka | **BI and Visualization:** PowerBI, Tableau, Excel | **RPA:** Power Automate, UiPath | **Cloud:** Microsoft Azure, AWS | **Project Management:** Agile, Scrum, Lucidchart, ProjectLibre | **Generative AI:** OpenAI API, Prompt Engineering, RAG, Dify, Docker, LLMs (GPT-4, Claude)

PROFESSIONAL EXPERIENCE

ACCORDION INDIA

Data Engineer

Jun 2024 – Jun 2025

- Built scalable ETL pipelines for private equity portfolio companies in the US using SSIS to ingest data from multiple sources such as HubSpot, Google Analytics and UKG, enabling faster data availability and accelerating downstream reporting by 40%.
- Automated repetitive workflows using Robotic Process Automation (RPA) tools like UiPath and Power Automate, cutting manual effort by over 20 hours a month.
- Developed Power BI dashboards to visualize key metrics for stakeholders, improving reporting efficiency and directly increasing Net Promoter Score by 20%.
- Created reusable SSIS templates and standardized data ingestion processes, reducing new pipeline development time by 35%.

Technical Associate Intern

Jan 2024 – Jun 2024

- Partnered with senior engineers to optimize SQL queries used in reporting pipelines, reducing query execution time by 25% in critical reports.
- Collaborated with the data management team to monitor and troubleshoot ETL job failures, resolving recurring issues and improving pipeline success rate by 30%.
- Coordinated with the business team to understand reporting requirements and client context, contributing to the design of five dashboards highlighting KPI metrics.

GET9NINE SOFT PRIVATE LTD

Data Analyst Intern

Jun 2023 – Aug 2023

- Built a multiclass sensor classification system using Scikit-learn (KNN, SVM, Random Forest) on IoT sensor data from a Bosch BME688, achieving 88% accuracy with applications in automated food quality inspection.
- Collaborated across a three-member team to handle data collection, preprocessing, and model training, dividing work across sensor calibration, feature extraction, and classification pipeline development.

PROJECT EXPERIENCE

AI-Powered Healthcare Insurance Fraud Detection System

May 2026

- Engineered 15+ provider-level features by merging inpatient, outpatient, and beneficiary datasets from Kaggle's Healthcare Provider Fraud Detection dataset, training Logistic Regression, Random Forest, and XGBoost models to predict fraudulent providers, achieving a ROC-AUC of 0.951 and recall of 0.874.
- Designed a 5-tier Decision Automation Engine converting fraud probabilities into operational routing actions (auto-approve to payment hold), with claims over \$10,000 mandatorily flagged for human review, reducing manual triage effort across the full claims pipeline.
- Built a 6-page Streamlit Command Center with batch scoring, case-level investigator review, and a business impact calculator, cutting fraud review from unstructured manual work to a structured 5-step triage workflow across 3 risk-tiered claim queues.

Financial Complaint Resolution System

Apr 2026

- Built a 3-agent AI pipeline using the Anthropic API to automate financial complaint processing where Agent 1 classifies, Agent 2 routes, and Agent 3 drafts a response, cutting manual handling to zero across 493 CFPB complaints.
- Processed complaints in batches of 10 to surface recurring issues across 3 product lines, flagged 148 systemic patterns, and routed every complaint to one of 4 internal teams with no manual triage.
- Wrote a resolution agent that produced regulatory-compliant customer letters citing FCRA, GLBA, and Regulation Z for each case, with an average estimated resolution time of 10 days across a dataset of 49,332 complaints.

LEADERSHIP AND VOLUNTEER EXPERIENCE

CHORDS & CO.

Content Analytics Lead

July 2022 – May 2023

- Ran A/B tests on content formats and posting schedules, used Instagram Insights to track which variables drove follower growth, and iterated on findings, growing the account 40% in three months.
- Built a weekly performance tracking cadence across reach, engagement rate, and impressions to guide content decisions, pushing average post reach up 60% and engagement rate by 25%.
